

TASK 2:

2.1: Log in to your free Jira Cloud instance. Create a new "Scrum" project for the "Hello World" application.

Task 2.2: Create the following issues within your new project:

- One "Story" titled "Implement User Authentication Feature".
- One "Task" titled "Setup Flask Environment".
- One "Bug" titled "Login Page Displays Error".

Task 2.3: Navigate to the project's board. Move the "Setup Flask Environment" task from "To Do" to "In Progress".

The screenshot shows the Jira interface for the 'Hello World Application' project. The board is in 'Board' view, displaying a Kanban workflow with three columns: 'IN PROGRESS' (1 item), 'TO DO' (2 items), and 'IN REVIEW' (0 items). The 'IN PROGRESS' column contains the task 'Setup Flask Environment' (HWA-2). The 'TO DO' column contains 'Implement User Authentication Feature' (HWA-1) and 'Login Page Displays Error' (HWA-3). A notification banner at the bottom left states 'Sprint started' with the message 'We've filtered the board to show your new sprint. Good luck, team!'. The left sidebar shows the project navigation menu, and the top bar includes search, create, and premium trial information.

Column	Count	Task	ID
IN PROGRESS	1	Setup Flask Environment	HWA-2
TO DO	2	Implement User Authentication Feature	HWA-1
TO DO	2	Login Page Displays Error	HWA-3
IN REVIEW	0
